

OYAKHILOME JESSICA ESEOSA

Profile Summary

My primary objective is to ensure that the creation and delivery of goods and services comply with client expectations by using my technical knowledge across the whole software life cycle. With the assistance of a professional software development team and my extensive personal knowledge, abilities, and competence in front-end development, I am convinced that this objective can be achieved. My abilities in software creation, implementation, testing, and upgrading were enhanced by my employment as a junior front-end developer. Keeping up with the latest IT developments and technologies is one of my objectives. I'm confident I can provide the company with something worthwhile if given the chance.

Work Experience

Web | Mobile Development Intern

Alabian Solutions, Ikeja, Lagos / January–June 2021

- Built an e-commerce website using NodeJS, ReactJS, and template engine Embedded Javascript.
- Built a religious website for a church using Embedded Javascript.
- Developed a virtual classroom and a teleconferencing system using the template engine EJS and NodeJS.
- Contributed to streamlining the debugging procedure for the development team.
- Wrote interfaces to manage backlog data using JavaScript, utilizing my expertise in the language.
- Fixed bugs in an existing mortgage app, which lowered consumer complaints by more than 20% overall.
- Collaborated with multiple development teams during the analysis, design, and implementation phases of a dating application using React Native, and React JS which was satisfactory to the client.

Quality Assurance (Software) Tester

Babcock University/January 2022-April 2022

- Performed manual and automated testing using Postman and Postwoman on a Virtual Classroom and Teleconferencing System.
- Leveraged Cypress to perform automated tests on Instagram sites.
- Performed quality assurance testing on a registration site using cypress, which decreased errors on the site.

Frontend Web/Mobile Developer

Nerd buds/August 2022-Present

- Designing, developing, and testing UI for mobile and web applications.
- Building reusable code and libraries for future use.
- Accurately translating user and business needs into functional frontend code.
